HIPROFlex

ADVANCED METATARSAL PROTECTION

COLLECTION WITH HIPROFLEX

> SPECIAL

HiProFlex is a **new technology** that **provides** both **protection** and **comfort** for the **metatarsal area**.

PROTECTS AGAINST:

- > FALLING HEAVY OBJECTS
- > IMPACTS FROM MACHINERY OR TOOLS
- > CRUSHING OR COMPRESSION OF THE FOOT

FEATURES

**HIGH
ELASTICITY**

**LATERAL
PROTECTION**

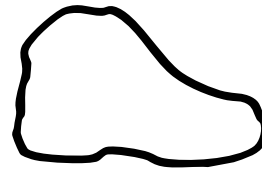

**PADDED
COLLAR**

**RESISTANT TO IMPACT FROM
A 20KG WEIGHT DROPPED
FROM 0,50 METERS
(100 JOULES)**

BUILT-IN DESIGN: INVISIBLE SAFETY

The device is **designed to integrate seamlessly with the footwear's aesthetics**. In this way, HiProFlex guarantees maximum protection while ensuring it does not alter the style or appearance.

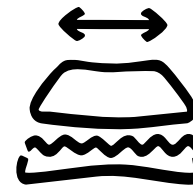

SMART GEOMETRY: BREATHABILITY AND FLEXIBILITY

The mesh structure, featuring holes and notches, provides an ideal balance of **breathability, flexibility, and comfort**. This innovative design allows the foot to breathe and move naturally while maintaining a high level of safety.

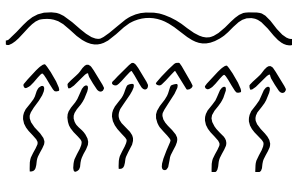

DOUBLE-LAYER STRUCTURE: SHOCK DISSIPATION

HiProFlex technology consists of **two overlapping layers**, layers that create interconnections to quickly and evenly dissipate shocks throughout the structure. The synergy of these two layers distributes force over the entire surface, offering **optimal protection against accidental falls** of heavy objects.

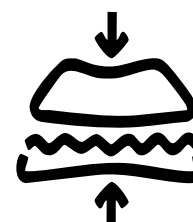

VARIABLE DENSITY: PROTECTION THAT ADAPTS TO THE FOOT

The mesh density varies based on need: it **increases** in high-impact areas for greater shock absorption and becomes **shock absorption and becomes lighter and more flexible** in low-risk areas for better joint mobility.

PROTECTIVE SIDE WINGS: TOTAL DEFENCE

The two side wings of the HiProFlex structure wrap around the metatarsal area, providing extra **protection against side impacts, shocks and compression**.
